## REPORT OF THE SELECTMEN.

#### Fellow Citizens of Hyde Park:

Your Board of Selectmen have the honor to present herewith the twentieth annual report of the receipts and expenditures of the town by the various officials to whom you intrusted these duties for the year ending January 31, 1888.

The funds committed to the care of this Board have been expended to the best of our ability, and in such a manner as we trust will meet with your approval. It is with much satisfaction that we refer you to the "statement in detail" of our expenditures for the year, showing, as we think it will, a balance unexpended to the credit of each and every appropriation that you intrusted to our charge. We are also pleased to be able to say, There are no outstanding bills or legal claims against the town for 1887, so far as we have any knowledge. All "pay-rolls" have been made up to this date, inclusive, and discharged.

#### PERMANENT IMPROVEMENTS

On our streets and sidewalks have been continued this year by constructing a concrete walk, with edgestones on one side of Water street, from Fairmount avenue to Bridge street, and on one side of Highland street from Fairmount avenue to Warren avenue; also on Sunnyside street fronting estate of Benjamin C. Vose, and on Gordon avenue fronting estate of Col. J. B. Bachelder; also on Webster street fronting estate of J. J. Enneking, and on Fairmount avenue from the bridge to Station street, with a crosswalk to the corner of Railroad avenue; and, without edgestones, a concrete sidewalk with gutter combined has been constructed on Fairmount avenue from Highland street to

Summit street. Brick sidewalks have been constructed on one side of Fairmount avenue from Beacon to Highland street, and on Highland street from Warren avenue to a point opposite Albion street; on one side of Pond street from Fairmount avenue to Williams avenue; also on northerly side of Oak street and a part of Maple street to Fairmount avenue, and on a part of one side of Pine street at corner of Maple street; and curbing has been located on Hyde Park avenue (both sides) from Arlington street to West, and on easterly side from West street to Dell avenue. In all improvements of this nature it is important that edgestones and sidewalks should be placed at grade; consequently a large amount of labor and material has been necessary in regrading the roadways to conform to that of the sidewalks so constructed, besides, in many instances, taking up and repaying the gutters, while in other cases, paving gutters anew has, of necessity, been a part of such improvement. All such work, as well as that on highways generally, has been done under the supervision of Mr. D. W. Phipps this year, the same as last. If the town should see fit to appropriate at all extensively for permanent improvements another year, we trust that our successors will pardon the suggestion on the part of this Board that it be expended in part on Central Park avenue from River street to Walnut street, also on Hyde Park avenue, West street, Arlington street, East River street, and extend the Central avenue walk to Arlington street.

We would also suggest for their consideration, and that of the town, the advisability of conducting the water from the gutters on Fairmount avenue at Highland and Pond streets in an underground drain to the river.

#### HYDE PARK AVENUE.

This thoroughfare, though still in an unfinished condition, has been greatly improved at quite a large outlay of money during the past season, and while the work (so far as done) has met the hearty approval of nearly all citizens, and the travelling public as well, we have nevertheless met strenuous opposition. That, too, at a point where improvement seemed to us most needed; consequently at this place the great inconvenience (to put it mildly) which has been the cause of frequent complaint on the part of some of the abutters still exists.

A natural "water basin" is not, in our estimation, a good place in which to build, buy or locate a habitation. But when people do so locate, and repairs and improvements on the highway becomes a necessity, such abutters should in some way harmonize their differences, do their part, and allow the town to do its part, without a threat of prosecution or a claim for damages by any one.

#### DANA AVENUE.

The extension of this avenue from Summit street to the Milton line (as decreed by the County Commissioners), has been roughly constructed to a grade. But where filling became necessary it will settle somewhat, and in the coming spring or summer will need to be brought up to grade again, the gutters formed, sidewalks made and all generally smoothed up and properly finished, when the County Commissioners may be notified that said way is completed and subject to their inspection and approval.

#### HIGHWAYS.

The amount appropriated for repairs on highways, etc., has been expended principally in reconstructing the Fairmount avenue bridge, repairing Summit street, Central Park avenue, and streets in the Readville district, together with other places where it was thought repairs were most needed, also for necessary work incident to the winter season. There are still many places on our highways where repairs are required to a greater or less extent, but as such were not considered at all dangerous we have preferred to leave them for future consideration rather than to exceed the means placed at our disposal.

#### PLANK WALKS.

Between three and four thousand feet of plank walks have been laid. Possibly more than actual necessity required, but we are assured that these walks are fully appreciated by all who have occasion to use them. Besides the question of economy was taken into consideration, other suitable matarial being difficult to obtain, and the distance to haul it so great and expensive.

#### ROAD MACHINE.

A road machine or scraper has been purchased this year for the sum of \$250, which has done good service and we think it a valuable acquisition to the highway department. especially for the purpose of repairing some of our outlying streets. In this connection we would recommend to the consideration of the town the advisability of providing a building, or some other suitable place where a sufficient quantity of sand may be stored during the summer and kept dry for use on icy sidewalks along our principal streets during the winter.

We would also call to your notice the great increase of travel and consequent wear our main streets are sustaining year by year, as time advances, and suggest, (as a matter of economy), that the town own and operate a "stone crusher," to the end that such of our streets may be more thoroughly and systematically repaired or rebuilt. We think that such a machine might be located where it could be operated to advantage in the winter in preparing material for such work to be done the following summer.

#### BRIDGES.

Neglected for years, extensive repairs on our bridges became an absolute necessity with us. Consequently "Fairmount Avenue Bridge" has been most thoroughly rebuilt, all iron-work carefully scraped and painted and we think it now stronger, safer and more durable than ever before.

"Central Park Avenue Bridge," (over Mother Brook,) has also been rebuilt. The centre span, or arch, which has been the cause of so much expense to the town, was removed, thereby giving an unobstructed course the entire width of the roadway. West River street bridge in the Readville district has been newly covered in a substantial manner, thus making all of our bridges (except a small one on Hyde Park avenue over Stony Brook) new or nearly so.

#### INCIDENTALS.

The appropropriation placed in charge of this Board for incidental expenditures has been heavily drawn upon during the year in meeting the demands of your Board of Health. While in the discharge of their duty they have found it necessary to expend a sum largely in excess of any previous year, in fact, unprecedented in the history of our town, to defray which we had no means other than what this appropriation afforded, nevertheless we have guarded it as closely as possible and are pleased to leave a handsome balance unexpended as a legacy to our successors.

#### DEFICIENCY OF 1886.

To such outstanding bills, claims &c., as came to us from last year, we have given our best efforts and where possible to settle them, we have endeavored to do so with a view to the best interests of the town and the satisfaction of all concerned. There are some however, that we have been unable to adjust as yet.

#### LITIGATION.

The town has been remarkably fortunate in avoiding litigation from any cause whatever during the year. The policy of the Board has been conciliatory rather than oppressive. And to avoid any and all controversies of an unpleasant nature by reason of any slight, or apparent change of grade, while carry ing on the permanent improvements or other work during the past season, we had prepared, and adopted a blank application and release to the town, which all abuttors on any street, where the construction of a sidewalk was contemplated, were expected to sign, and in no case whatever, has there been the slightest claim made upon the town for damage to fence grounds, or otherwise, nor do we believe there will be. We earnestly recommend the adoption of this plan by our successors.

#### POLICE DEPARTMENT.

Considering the number employed in this department, the results are as satisfactory as could reasonably be expected. Chief Jenney, with officers Fogg and Rooney have been active and zealous in the discharge of their duty, and generally well satisfied with their success. It must be borne in mind however, that officers who are painstaking and faithful and finally successful in their efforts, have every reason to feel that they should be tully sustained, not only by their superiors, but by all law-abiding citizens.

#### STREET LIGHTS.

\$4,000.00 being the appropriation made for lighting our streets, it was clearly our duty to curtail in some form, if we would go through the year, keeping within the means provided. Therefore the gas service was discontinued and the oil lights alone have been used, being unable to maintain both systems with the money appropriated. Besides, the subject of lighting the streets by means of electricity came up for consideration, and the town voted to authorize us to contract for a term of years, "to light the streets of the town where now lighted," and for a sum not to exceed \$4,000.00 per annum. The subsequent struggle relative to this matter, was ours for a time, until demonstrated (to our satisfaction at least) as an utter impossibility, (with any electric light that would be satisfactory,) for the sum above named. When at a subsequent meeting, and by a vote of the town, the whole subject of contracting for street lighting was placed in charge of a committee, with power to contract for electric and other lights for a term of years, the town appropriating \$5,500.00 for that purpose. We cannot properly speak of the protracted deliberations on the part of that committee ending about the middle of November last, at which time and under direction of the committee (as voted by the town) your Board of Selectmen, signed a contract made and entered into with the American Electric Manufacturing Company, for a term of three years, to light not less than 300 nights each year from one-half hour after sunset until midnight, using 75 double arc electric lights of 2000 candle power each for so doing, and for the sum of \$70.00 for each and every light per year. Inasmuch as a contract has been made for electric street lights only, there are numerous places on some of our streets where those lights do not reach; consequently they are unprovided for, unless we continue the oil system to some extent, which we have thought it best to do, until such time as the town may further provide.

#### DRINKING FOUNTAINS.

During the twenty years of our existence as a town (except for the efforts of one or two public-spirited citizens) we have been wholly without a wayside watering place at any point within our limits where this great need to man and beast could be supplied, and so pressing was the demand for this much needed improvement that we could do no less than give it every necessary encouragement. Therefore, as a beginning, the following correspondence took place:

> Hyde Park, Mass., June 10, 1887.

ROBERT BLEAKIE, ESQ.,

President Hyde Park Water Co.:

DEAR SIR, — The Board of Selectmen are contemplating the erection of one or more drinking fountains (not to exceed three) in our town, and desire to know on what terms your company will agree to supply the same with water for, say, about six months during each year. Will your company kindly consider this subject at your earliest convenience and communicate your decision to this Board? o'bliging

Yours very truly,

D. W. C. ROGERS,

For Board of Selectmen.

HYDE PARK, June 13, 1887.

TO THE BOARD OF SELECTMEN:

GENTS,—In reply to your favor of the 10th instant, I am directed to say that we will furnish drinking fountains as you suggest, not to exceed three in number, for, say, s x months in each year, free of charge for water until further reasonable notice, provided you will pay the cost of making all necessary connections with our main pipes, and also provided that the use of the water referred to shall be restricted to reasonable and prudent use.

Yours respectfully,

CHAS. F. ALLEN, Clerk, Hyde Park Water Co.

This generous response on the part of the Hyde Park Water Co. was gratefully accepted on behalf of the town. Three fountains were purchased, one of which is located in Everett square, one on Milton street, near Sprague street, in Readville, and one at Clarendon Hills.

#### BRIDGE STREET.

Claims have been made by owners and abuttors on this street for damage, alleging the taking of their land by the town last year, when constructing the bridge (or approaches thereto) over the Neponset river, and in order to ascertain if such was the case, (feeling that the town owned a strip of land forty feet in width for a highway and needed no more) we employed Mr. George L. Richardson, who made the original survey, plans, profile, &c., (and as we understand by which the street was accepted by the town,) to survey and locate the lines as then laid out. He has done so, driving stakes, and otherwise marking the true location of the street at different points, according to a plan of 1869 on file, and states that the bridge is not on a parallel line with the street as laid out; that the southeasterly corner is about four feet off the line, "up stream," that the southwesterly corner though to a less extent, is also off the line. The fences on. either side of the street, from the bridge to Walnut street, are not in line, and that at the corner of Water street is nearly six feet (at one point) within the limits of the highway. Consequently it now remains for the town to take such action as it may deem best, under the eircumstances.

#### EAST RIVER AND WEST STREETS.

The construction of these streets under the decrees of the County Commissioners, (plans &c., now on file with the Town Clerk,) are matters for the early consideration of the incoming Board, also for the town to provide means therefor. A large quantity of stone will be required in the work on River street, which (to some extent); are already on the ground, purchased and payed for.

#### CENTRAL AVENUE.

In widening this street last year adjoining lands lying between Everett Square and Winthrop street were pur-- chased, but on the opposite, or easterly corner of Winthrop street, the locating of the curbing by the town, and the removal of the abuttor's fence by some one, was all that was accomplished, and now, to continue the side line of the street fronting this estate as laid out at that time, some action on the part of the town is required. The present owner (as we understand) is willing to deed to the town the necessary land on the avenue provided the town will discontinue a portion of the two streets at the corner as contemplated by the survey of last year, and the curbing as already located. which action we would respectfully recommend.

Respectfully submitted,

J. D. McAVOY, D. W. C. ROGERS, M. P. MORRELL, Selectmen and Surveyors of Highways.

Hyde Park, Mass, Jan. 31, 1888.

### ZENAS ALLEN.

Died at his residence in this town on the twentieth day of May, 1887, at the age of 81 years 6 months and I6 days.

Mr. Allen had been a resident of the town since its incorporation in 1868, and was always held in the highest esteem by his associates and the people whom he served. He was a member of the first Board of Selectmen, Surveyors of Highways, Assessors and Overseers of the Poor of Hyde Park, and was faithful to every duty, conscientious, upright and true as a Christian man, citizen and public official.

## REPORT OF THE BOARD OF HEALTH.

The Board of Health, in making their annual report, wish to congratulate the inhabitants of the town upon the generally healthy condition here during the past year. Only a comparatively small number of contagious diseases have been reported, and of these only five resulted fatally. The number of cases and resultant deaths, and comparison with those of last year, is shown in the following statement:

For the year ending January 31, 1888, there have been reported to the Board the following cases of contagious diseases: Diphtheria, 20 cases, with 3 deaths; scarlet fever, 39 cases, with no deaths; typhoid fever, 11 cases, with no deaths; membranous croup, 2 cases, with 2 deaths; measles, 5 cases, with no deaths; against diphtheria 5 cases, scarlet fever 10 cases, typhoid fever 3 cases (with 1 death) for the year 1886.

The Board has been called upon to abate several nuisances, which, from various causes, had been growing worse every year, until they had become a serious danger to the health of the people living in their vicinity, and in fact to the whole town; for had a contagious disease, caused by the accumulation of filth in these pest holes, started near them, it might have spread throughout the town. One of these unhealthy places—and perhaps the worst one in town—was caused, in part, by the stoppage of a drain on West street, leading from the low land lying between West and Arlington streets and East River and Elm streets. Upon receiving a petition, signed by a large number of citizens living in the vicinity, praying for the abatement of this nuisance, a hearing was held by the Bóard, at which witnesses were examined, and certificates received from four physicians, al testifying to the extremely offensive and unhealthy churcter of the place. The Board then made a personal examination, after which the low portion of this tract, lying near West street, was adjudged injurious to the public health and a dangerous nuisance. The Board caused the drain to be opened and repaired in a thorough manner, thus draining the pool of slimy water and leaving the land dry. It is believed the improvement will be permanent and save much sickness. The cost to the town for doing this work was about \$300.

Another place upon which a hearing was held by the Board, on petition, was a pool of stagnant, slimy water, back of No. 27 Pierce street, and near Leslie's mill. This place was in like manner investigated and adjudged unhealthy. By order of the Board a drain was dug, drainpipe laid, and the nuisance abated. The cost of doing this was assessed entirely on the abutters, the town not being obliged to bear any portion of the expense.

A number of other similar petitions were received, and hearings thereon were held, but in no case at any expense to the town, except for legal advice, surveys, and serving notices. A very large number of other complaints have been made to the Board during the year. In all cases a personal investigation has been made, and when nuisances were found existing they were promptly abated.

The usual amount of incidental expenses have been incurred during the year.

The Board has discouraged the keeping of swine when it could consistently do so, and comparatively few permits have been granted. There have been many calls upon the Board to remove swill. We have again tried the experiment of having it removed for its value by different parties, each being assigned a prescribed section, but it has been only partially successful. The best course would seem to be for the town to remove and sell the swill, covering the expense as far as possible from the proceeds of the sales.

We have been called upon to examine a number of wet cellars. We believe all such should be cemented. In the absence of a system of drainage, it is the only safeguard against sickness. No ashes, garbage, or dirt of any kind, should be allowed to remain in any cellar during the summer months; and pure air should be allowed to circulate through the cellar at all seasons, in pleasant weather. Our experience teaches us that many cases of sickness might be avoided if the above suggestions were strictly complied with by owners and tenants of houses.

The Board, in this connection, wish, in the most earnest manner, to urge upon the attention of the people of this town the necessity of an early and serious consideration of the question of a system of sewerage. They believe it to be of more importance than any other improvement that can be made, inasmuch as the health of the people of the town, in a large measure, depends upon it. It is hoped that it will be given immediate and earnest thought, and that prompt and decisive action will be taken.

The following regulations were adopted by the Board at the commencement of the year :

PUBLIC STATUTES, CHAPTER 80, SECTION 18.—The Board of Health of a town shall make such regulations as it judges necessary for the public health and safety, respecting nuisances, sources of filth and causes of sickness within its town. Whoever violates any such regulation shall forfeit a sum not exceeding one hundred dollars.

**REGULATION 1.**—No person will be permited to keep any swine within the limits of the town of Hyde Park without a written permit from the Board of Health.

REGULATION 2.—No person shall place, or cause to be placed, or by any means empty, or caused to be emptied, any sewage, the drainage of any sink or stable, or the contents of any cesspool or privy well or other noxious or filthy matter, in or upon any public street or way of this town.

REGULATION 3.--No person shall remove, or carry in or through any of the streets, lanes or avenues, places or alleys, within the town of Hyde Park, the contents of any cesspool, vault, privy, or privy well, swill or house offal, (either animal or vegetable,) or grease, or bones, unless a permit be granted by the Board of Health upon such terms and conditions as said Board may deem necessary.

REGULATION 4.—No person shall bury the contents of any cesspool, vault, privy or privy well within the limits of the town of Hyde Park unless a permit be granted by the Board of Health.

PUBLIC STATUTES, CHAPTER 80, SECTION 79.—When a physician knows that a person whom he is called to visit is infected with small pox, or any other disease dangerous to the public health, he shall immediately give notice thereof to the Selectmen or Board of Health of the town; and if he refuses or neglects to give such notice, he shall forfeit for each offence not less than fifty nor more than one hundred dollars.

**REGULATION 5.**—The following diseases are considered contagious and dangerons to the public health :—Small Pox, Diphtheria, Scarlet Fever, and Typhoid Fever.

The Board of Health earnestly requests that no swill or vegetable matter be deposited in vaults, as such disposition of it is a very fruitful source of disease.

The Board of Health intends, by personal supervision, to see that the above regulations are carried out, and desires the inhabitants of Hyde Park to assist in the work of frequently cleaning out their cesspools and vaults, and removing all noxious and offensive matter from their premises.

In conclusion, the Board recommend the town to make a separate appropriation for the use of the Board of Health, to be drawn on its order. This would save much perplexity and annoyance to other town officers, and largely increase the efficiency and promptness of the Board's acts.

Respectfully submitted,

GEORGE F. DOWNES, Chairman; W. O. HURD, M. D., Secretary; E. H. BAXTER, M. D.,

Board of Health.

## REPORT OF OVERSEERS OF THE POOR.

#### TO THE CITIZENS OF HYDE PARK:

In rendering a statement of the affairs of this department we can only report that we have had about the usual number of applicants. There are nineteen persons being fully supported to-day, an excess over any former years. Of this class there are ten adults and nine children. Representative F. A. Wyman, Thanksgiving, donated \$20 in turkeys and "fixings" for the poor. We also acknowledge a donation of \$5 from some unknown person, which we expended in charity Christmas. Many thanks and blessings were extended to the donors.

Overseers of Poor.

# REPORT OF TRUSTEES OF PUBLIC LIBRARY.

At the time of our last report the Library was closed, awaiting the completion of the alterations which were being made in the building to render it perfectly safe for occupancy. These required a longer time than we then thought would be needed and, as a consequence, it was not until the eleventh day of April that the Library was re-opened to the public. Therefore the statistics given in this report will cover a period of only nine and one-half month's actual working time.

During this period the circulation has been 20,831 books, a monthly average of 2,314; new cards have been issued to the number of 309; fines collected to the amount of \$22.53; 227 books bound and re-bound, and upwards of 1000 covered and re-covered. The number of books has been increased 548 by purchase and 51 by gift, including 18 pamphlets. The list of magazines has been enlarged by adding the "New Scribner's"; the newspapers remain the same as at the last report. The average monthly use of magazines in the reading room was about 120 and of other books about 60. The superior attractions of the gymnasium, and the games, in the Y. M. C. A. building next door have drawn away many who formerly frequented the Library reading room. Under certain conditions the magazines may be taken out for perusal at home.

The gallery has been extended at a slight cost so as now to make available all of the shelf-room.

The present value of the Library fund is \$4,924.36. Peculiar facilities are given by the rules and regulations for the use of Library books by the public school scholars in connection with their school work, and seem to be freely utilized.

We alluded in our last report to the desirability of a new catalogue. No action in reference thereto having been since taken by the town, and the number of books not included in the catalogue being quite large, we decided to have all these compiled in one supplement. This has been done and the result is already before the patrons of the library. It is a handsome and substantial pamphlet of 44 pages, containing the titles of 3600 books, entered under their titles, the authors, and, many of them, under subjects. This, with the original catalogue (of 1881), gives a complete list of all books in the library up to its date, about 9300 in all. The cost of this supplement has been about \$275, of which \$229 has been paid from the library fund. The sum taken from the fund we shall consider as a temporary loan to be repaid from money which will be received from sales of the supplement. For we feel it to be our duty, and for the interest of the public, to follow the example of our predecessors and keep intact the fund, which, by the accretions of interest, is yearly growing in amount and will, ere long, constitute a substantial nucleus for a building fund, which we trust will be made up by a suitable appropriation by the town and voluntary contributions of public pirited citizens of pecuniary ability, and devoted to the erection of a building which shall be a credit and an ornament to the town and a fitting receptacle for the treasures of our very desirable and valuable Library. We think that many of our citizens fail to recognize fully the excellence of the Library and to realize the surprised commendations which it has received from out of town visitors of acknowledged literary ability.

The price which we have fixed upon the supplement is 15 cents, which will not repay the cost of its production and which we are convinced will work no hardship to any patron of the Library. Upon inquiry, we have found that the Boston Library, as well as almost all of the town libraries, impose a price upon their catalogues, not only thus to obtain repayment for their cost, but from the conviction that what costs nothing is usually treated as worth nothing.

As we know that the Library is capable of doing a vast amount of good to the residents of Hyde Park and as we desire that it shall not be debarred in any way or by any cause from doing all possible, we earnestly invite all visitors to the Library to mention to us any lack of facilities which they may observe, and to make any suggestions tending to promote its usefulness and efficiency.

CHARLES E. JENNEY, Chief of Folice and Keeper of Lock-up.

# ENGINEERS' REPORT.

TO THE BOARD OF SELECTMEN:

GENTLEMEN,—Herewith we present our report for the year ending Januayy 31st, 1888. It is with great pleasure that we call your attention to the high state of efficiency in which our Department stands, and we can truly say that each and every man has done his duty in a satisfactory manner to the Board of Engineers.

The apparatus belonging to the town is as follows :

- 2 Steam Fire Engines.
- 1 Chemical Engine.
- 1 Hook and Ladder Truck.
- 2 Hose Carriages.
- 1 Hose Wagon.
- 4 Sets of Swinging Harness.
- 1 Single Harness.
- 4,000 feet of Cotton Hose in fair condition.

300 feet of Cotton and Rubber Hose for Chemical Engine.

- 3 Relief Valves.
- 2 Shut-off Nozzles, together with the requisite number of Play Pipes, Wrenches, Bursting Strape, Hose Lines, Lanterns, &c., &c.

The partial addition of the fire alarm system, which was added to the Department last year, has been a great help to the Department thus far, and when perfected by the addition of a tower striker on the bell of the Methodist church, and five street boxes, cannot fail to prove valuable to the best interest of the town. We recommend the location of a street box at the Mattapan Mills, one at or near the Hair Factory, one at or near the Cotton Mill, one at or near the corner of Dana avenue and Loring street, and one at or near the shops of the American Tool and Machine Co.

Additions have been made during the year to the fire alarm system as follows: One street box, located in Everett square; one tapper in Engineer's house, and one mile of wire. We have added a bell tower and bell to the Readville Hose House, which is a great benefit to that section of the town.

We recommend the sale of the two steamers and the purchase by the town of a second-class steamer.

As there is no water supply in case of fire at "Corriganville," we hope that the hydrant voted by the town will be placed in condition for service as soon as possible.

The Engine House is in great need of repair, and we recommend an appropriation for the same.

Appended is a list of the officers, with the number of men in the Department; also a list of alarms and fires for for the year, with insurance and loss.

RINALDO WILLIAMS,

Chief Engineer.

ROBERT SCOTT, JR.,

JOHN H. MCKENNA,

Assistant Engineers.

#### OFFICERS AND NUMBER OF MEN.

The following is a list of the officers of the several companies together with the number of men in the employ of the department.

Hose Co. No. 1.

A. R. WILLIAMS, Foreman.W. F. DONLAN, Assistant Foreman.A. BOSWELL, Clerk, and five men.

Hose Co. No. 2.

FRED T. GREENLOW, Foreman.O. G. DALTON, Assistant Foreman.J. D. GREENLOW, Clerk and Treasurer, and five men.

Hose Co. No. 3.

J. H. O'BRIEN, Foreman,D. W. MAHONEY, Assistant Foreman.C. H. GALLIGAN, Clerk and Treasurer, and two men.

CHEMICAL ENGINE CO. No. 1.

SCOTT WILLIAMS, Foreman. A. W. STORY, Clerk and Treasurer, and three men.

HOOK AND LADDER CO. NO. 1.

WILLIAM HOLTHAM, Foreman.R. P. HOLMES, Assistant Foreman.W. R. MCDOUGALD, Clerk and Treasurer.Number of men seven.

There are ten Substitutes who are paid by the several companies such compensation as they may direct.

M. J. FOLEY, Engineman.

JOSHUA WILDER, Steward.

# AUDITORS' CERTIFICATE.

In compliance with the By-laws of the Town, the undersigned have examined the accounts of the Selectmen, School Committee, Collector of Taxes, Town Treasurer, Commissioners of Sinking Fund, Trustees of the Public Library, Overseers of the Poor, and Board of Health, and hereby certify that the same are correct, and all payments accompanied by proper vouchers.

> ASA J. ADAMS, WALLACE D. LOVELL, JOHN H. RUSSELL, *Auditors.*

# BY-LAWS.

#### NOTIFICATION OF TOWN MEETING.

Every town meeting shall be notified by posting copies of the warrant calling the same, in ten public places in the town, seven days, at least, before the day appointed for said meeting;

#### ANNUAL TOWN MEETINGS.

The annual town meeting for the election of town officers shall be held on the first Monday of March of each year. The meeting shall be opened at seven o'clock A.M., and the polls shall be kept open until sunset.

A town meeting shall also be held annually between the first Monday of March and the first Monday of April, for appropriating such sums of money as may be necessary for town purposes, and for transacting such other business as may legally be brought before said meeting.

#### RULES FOR THE GOVERNMENT OF TOWN MEETINGS.

1. - All questions submitted for the consideration of the town, involving the expenditure of money, shall be in writing, when so required by any legal voter.

2. — No vote fixing the period for closing a ballot shall be reconsidered after such ballot shall have commenced; but it may be in order to extend the period without such reconsideration.

3. — When a question is under debate, motions shall be received to adjourn, to lay on the table, the previous question, to postpone to a certain time, to postpone indefinitely, to commit, or to amend; which several motions shall have precedence in the order in which they are herein arranged.

4. — The powers and duties of the presiding officer, not especially provided for by law, or by the foregoing rules, shall be determined by the rules of practice contained in "Cushing's Manual," so far as they are adapted to the condition and powers of the town.

5.— No vote shall be reconsidered except upon a motion made within one hour after such vote has passed, unless such reconsideration is ordered by a vote of two-thirds of the voters present and voting.

#### FINANCIAL YEAR.

The financial year of the town shall begin with the first day of February in each year, and end on the thirty-first day of the following January.

#### MEETINGS OF TOWN OFFICERS.

The selectmen, overseers of the poor, board of health, surveyors of highways, and school committee shall post in some conspicuous place at their official rooms, a notice of the times of their respective meetings.

#### COLLECTION OF TAXES.

1.— The assessment of taxes shall be completed, and a list of the same delivered to the collector, on or before the first day of August of each year.

2. — All taxes which may be assessed, if paid on or before the first day of October next after the assessment, shall be entitled to such discount as the town shall vote at its annual meeting. All taxes shall be due and payable on or before the first day of November next following the assessment of said taxes.

3.— On the first secular day of each month, the Collector shall pay over to the town Treasurer all the taxes collected by him; and he shall on or before the first day of February in each year, make up his account and render the same to the Auditors.

#### DUTIES OF THE AUDITORS.

1. — The auditors shall examine the accounts of the selectmen, school committee, treasurer, collector, trustees of the public library, and all other officers or committees entrusted with the expenditure of money, quarterly, and shall certify as to the correctness of the same in the printed annual report.

2.—Before certifying to the accounts of the treasurer, they shall examine his cash-book, wherein shall be entered his receipts and payments, as they occur from day to day, shall see that he has paid out no moneys except on proper vouchers, carefully examine all payments for interest, and see that the funds on hand are intact.

3.— Before certifying to the collector's accounts, they shall examine his cash-book, showing the amounts collected from day to day, and showing when the same were paid over to the treasurer; shall see that he has collected interest on all taxes overdue, and shall see a complete list of abatements, and also a list of unpaid taxes.

4. — They shall see that the accounts of the trustees of the public library are kept in a correct manner, and that all payments are accompanied with proper vonchers.

#### COASTING.

Coasting on any of the public streets of the town is prohibited, except upon such streets as the Selectmen may designate each year by public notice.

#### HIGHWAY AND POLICE REGULATIONS.

1. — No building shall be removed over a public street without the written permission of the selectmen.

2.—The owner of such building, or the person or persons removing the same, shall give a bond in such penal sum, and with such sureties as the Selectmen shall determine, with condition to reimburse the town for all sums of money which it may be liable or compelled to pay in consequence of such use of the highways.

3.—No person except the Selectmen or the Surveyors of Highways, in the lawful performance of their duties,  $or_i$  those acting under their orders, shall break or dig up the ground in any street or public way in the town, without first obtaining a written permit from the Selectmen; and all persons acting under such permit, shall put up and maintain a suitable railing or fence around the part of the street so broken up, so long as the same shall remain unsafe or inconvenient for travellers, and he or they shall keep one or more lighted lanterns fixed to such railing or fence, or in some other way exposed every night from twilight in the evening through the whole night, so long as such street or way shall be or remain unsafe or inconvenient for travellers.

4.— No person shall ride or drive a horse in any street in the town at a rate faster than eight miles an hour.

5. — No person shall, without the written consent of the Selectmen, play at any game in which a ball of any kind is used, or fly a kite, or throw or shoot stones, arrows, balls, snow-balls, or other missiles, or discharge any gun, cannon, or firearm, or make any bonfire or other fires in any street or way where, the public have a right to pass.

6.— No person shall propel, drive, wheel or draw any bicycle, tricycle, cart or vehicle of any kind whatsoever except a child's carriage drawn by hand, nor use roller skates upon or over any sidewalk in this town, nor permit nor suffer any horse, cattle, swine or sheep, belonging to him or under his care or keeping to go upon or over the same, nor suffer any horse to remain hitched across, or upon, or otherwise obstruct or injure, any such sidewalk.

7. — No person shall hitch or fasten any horse to any ornamental tree standing or growing on or near any sidewalk, or to the boxing or guard about said tree, without the consent of the owner thereof. 8. — No person shall without a written license from the Selectmen, place or cause to be placed, or suffer to remain within the limits of a street or upon any sidewalk, so as in any manner to obstruct the travel thereon, any vehicle, wood, coal. manure, dirt, gravel, stones, building material, barrels, boxes, merchandise, or any rubbish or obstruction whatever.

9. — No person shall carry in a public street, house-offal, either animal or vegetable, or grease, or bones, or the contents of cesspools or vaults, unless he has been expressly licensed therefor by the Board of Health, upon such terms and conditions as said board may deem that the health and interests of the town require.

10. — Loud crying of wares or merchandise, or hallooing, hooting or making loud and unseemly noises on the public streets or squares of the town, to the annoyance of the citizens, is prohibited.

11. — No person shall behave in a rude, indecent or disorderly manner, or use profane, indecent, or insulting language, in any public place, or on any sidewalk or street in the town, to the annoyance or disturbance of any other person there being or passing in a peaceable manner, or be or remain upon any sidewalk, street, or crossing, or about doorways or places of business, to the annoyance or disturbance of any person.

12. — Three or more persons shall not continue to stand or remain in a group or near to each other, on any sidewalk or street or crossing, or in any public place, in such a manner as to obstruct a free passage for foot passengers, after having been requested by a constable or police officer to move on.

'13. — No person shall be or remain in any doorway, or upon any stairs, doorstep, portieo or other projection from any house or building, or upon any wall or fence on or near any street or public place, after having been requested by the owner or any occupant of the premises or by any constable or police officer to remove therefrom.

14. — No person shall make any indecent figures, or write, print, paint, or cut any obscene word or words upon, or deface, break or injure in any manner, any fence, post, sign, street lantern, building or structure; or commit a nuisance upon any sidewalk or other place resorted to by the public, or against any tree, building or structure adjoining a sidewalk.

15. — No person shall extinguish any street light, or extinguish or remove any light placed to denote an obstruction or a defect in any street or way, without proper authority.

16. -- No person shall swim or bathe in any of the waters with-

in the limits of this town, so as to be exposed in a nude state, to the view of any person passing or being upon any railroad or street or in any dwelling-house in this town.

17. — No person shall intermeddle with any hydrant, gate, gatebox or water pipe placed or located within the limits of any public way in this town, without permission from the Selectmen or the Hyde Park Water Company.

#### PASTURING OF CATTLE OR OTHER ANIMALS ON STREETS OR WAYS.

No person shall pasture any cattle, goat or other animal upon any street or public way in said town, either with or without a keeper, except within the limits of such way adjoining his own premises, and field drivers are instructed to enforce this by-law.

#### TRUANTS.

1.—The town hereby avails itself of the several provisions of the statutes of this commonwealth, now in force, relating to habitual truants and absentees from school.

2. — All children convicted of habitual truancy hereunder, and children between the ages of seven and fifteen years, residing in said town, and who may be found wandering about the streets or public places of said town, having no lawful occupation or business, not attending school, and growing up in ignorance, may be committed to the Lawrence Industrial School, at Lawrence, Mass., or to any house of reformation which has been or may hereafter be established by the County Commissioners of the County of Norfolk, or to any place provided by this town within its limits, for confinement, instruction and discipline.

3. — Two or more truant officers shall be appointed annually, whose duty it shall be to inquire into all the violations of the truant laws, and of the law relating to compulsory education, and to do all the acts required of them by the laws of the Commonwealth.

4. — It shall be the duty of every truant officer, previous to making any complaint under these laws, to notify the truant, or absentee from school, also his parent or guardian, of the offence committed, and of the penalty therefor, and if the truant officer can obtain satisfactory pledges for the restraint and reformation of the child, he may, at his discretion, forbear to prosecute so long as such pledges are faithfully kept.

5. — It shall be the duty of the School Committee, the teachers of the public schools, and the citizens generally, to aid the truant officers as far as possible in the discharge of their duties. 6. — It shall be the duty of the truant officers to keep a full record of all their official acts, and make an annual report thereof to the School Committee, who shall publish the same with their own report.

7. — Nothing in these by-laws shall be so construed as to alter or impair the obligation and duty of teachers to enforce punctuality and regularity of attendance, and to preserve good order and discipline.

#### LIST OF TAX-PAYERS.

The names of all persons paying a tax on real or personal property shall be published annually in the town report, together with the amount of tax assessed upon each, and whether the same is paid or unpaid.

#### DUTIES OF TOWN CLERK.

The Town Clerk shall keep a file of all town reports, reports of all committees chosen by the town, and all original documents relating to the affairs of the town which may come into his possession; he shall, as soon as practicable, after any election has been held by the town, in addition to the notices he is now directed to give to officers who are required to take an eath of office, also issue a written or printed notice to all persons who have been elected to any other office, or chosen to serve on any other committee, stating the office to which such person has been elected, or the duties which such committee was chosen to perform

#### CONTRACTS MADE IN BEHALF OF THE TOWN.

Every contract exceeding one thousand dollars shall be accompanied by a suitable bond for the performance of the same, or by the deposit of money or security to the amount of such bond.

#### ACTIONS AT LAW.

The Selectmen shall have full authority, as agents of the town, to employ counsel to institute and prosecute suits in the name of the town, and appear for and defend suits brought against it, unless otherwise specially ordered by a vote of the town.

#### CONVEYANCING.

Whenever it shall be necessary to execute any deed conveying land, or any other instrument required to carry into effect any vote of the town, the same shall be executed by the Selectmen, or a majority of them, in behalf of the town, unless the town shall otherwise vote in any special case.

#### BY-LAWS IN RELATION TO THE PREVENTION OF FIRES.

1. — It shall be the duty of every person who shall commence the erection of any building within the town of Hyde Park to notify the Board of Engineers thereof before he shall commence building the chimneys therein.

2. — All chimneys in wooden buildings shall be built of brick, stone, o other fire-proof non-conducting material. All brick flues shall be smoothly plastered *inside* with mortar from top to bottom or lined with earthen pipe, and shall be plastered *outside below the roofing*.

3. — In no case shall chimneys rest upon any flooring without a footing of masonry or iron supported by iron beams, having a secure bearing of masonry or iron at either end.

4. - All flues shall be topped out at least four feet above the roof of the building to which they belong. The brick topping out of chimneys shall not have more than two inches projection unless covered by a cap of metal or stone properly secured.

5.—Hearths of fireplaces or grates shall be laid upon brick or other trimmer arches, or upon bars of iron supporting a bed of brick-work.

6.- No wood-work of any kind shall be placed at a less distance than one inch from the outside brick-work of any flue. In no case shall a nail be driven into the masonry of any flue.

 $7. \rightarrow$  No wood-work shall be placed at a less distance than one inch from any tin or other metal flue or flues, pipe or pipes, used or intended to be used to convey heated air or steam in any building, unless such flues or pipes shall be cased with metal, leaving a free circulation of air all around the same.

8. -- No smoke-pipe in any such wooden or frame building shall here after enter any flue. unless the said pipe shall be at least twelve inches from either the floors or ceiling; and in all cases where smoke pipes pass through stud or wooden partitions of any kind, whether the same be plastered or not, they shall be guarded by either a double collar of metal, with at least four inches of air space and holes for ventilation or by a soap-stone ring, not less than three inches in thickness and extending through the partition.

9.—The Board of Engineers shall examine into all shops and other places where shavings or other combustible material may be deposited or collected, and at all times be vigilant in the removal of the same, whenever, in the opinion of a majority of them, the same may be dangerous to the security of the town from fires; and direct the owner, tenant, or occupant of said shops, or other places, to remove the same; and in case such owner, tenant, or occupant refuses or neglects so to do, shall cause the same to be removed at the expense of such owner, tenant, or occupant.

10.-It shall also be the duty of said Engineers to take cognizance of all buildings in the town in which any steam engine shall be used, and of all buildings in town in process of erection or alteration, and to make a record of such buildings as in their judgment may from any cause be dangerous, and report the same to the Selectmen forthwith. And whenever in the opinion of a majority of the Board of Engineers, any chimney, hearth, oven, stove, stovepipe, fire-frame or other fixture, or any camphene or other explosive or inflammable fluid or material, or whatever else may give just cause for alarm, should be altered, repaired or removed, they, the said Engineers, shall forthwith notify and direct the owner, tenant or occupant of the premises upon which the same are situated, to alter, repair, or remove the same, as the said Engineers shall direct. And in case such tenant, owner or occupant shall refuse or neglect so to do, the said Engineers shall cause the same to be removed, altered or repaired at the expense of such owner, tenant or occupant. And any person who shall obstruct the Engineers, or any of them, in carrying out the provisions of this section, shall be liable to the penalty hereinafter stated.

11.—The removal, extension or essential alteration of any building; also the rebuilding or repairing of any building which has been partially destroyed by fire, shall be subject to the same restrictions as are imposed by the foregoing By-laws on the erection of buildings.

#### PUBLICATION OF BY-LAWS.

The Selectmen shall publish these By-laws annually in connection with the town report.

#### PENALTIES UNDER THE BY-LAWS.

Every violation of any of the foregoing By-laws shall be punished by a fine of not less than one dollar nor more than twenty dollars, to be recovered by complaint before any trial justice in the County of Norfolk, or any other court having jurisdiction.

#### PROSECUTION UNDER THE BY--LAWS.

Any citizen may, and the selectmen, constables and police officers shall, prosecute every violation of the foregoing By-laws, by complaint before any trial justice in the County of Norfolk, or any other court having jurisdiction.

#### LIMITATION OF ACTIONS.

No person shall be prosecuted or tried for any breach of the provisions of any By-laws of this town, unless the complaint for the same shall be instituted and commenced within six months from the time of committing such breach.

All By-laws or parts of By-laws of this town heretofore existing are hereby repealed, and these By-laws of the town of Hyde Park shall go into effect from and after their adoption by the town and their approval by the Superior Court or any Justice thereof,

Commonwealth of Massachusetts. Norfolk, SS.

Hyde PARK, November 17, 1886.

At a meeting of the legal voters of said town of Hyde Paark, held im Everett Hall, on Wednesday, the seventeenth day of November, in the year of our Lord eighteen hundred and eighty-six, the foregoing By-laws were adopted by said town.

Attest:

HENRY B. TERRY, Town Clerk,

Commonwealth of Massachusetts. Norfolk, S.S.

SUPERIOR COURT, December Sitting, 1886, to wit: January 26, 18<sup>5</sup> The foregoing By-laws are hereby approved.

By the Court.

ERASTUS WORTHINGTON, Clerk.

True copies. Attest:

ERASTUS WORTHINGTON, Clerk.

# REPORT OF THE SCHOOL COMMITTEE

FOR THE

SCHOOL YEAR ENDING DECEMBER 31st, 1887.

TO THE CITIZENS OF HYDE PARK:

The public schools having been under our charge during the year last past, it becomes our duty at this time to submit for your consideration a statement pertaining to their work during that time that you may better judge of their present organization and efficiency.

# ORGANIZATION.

At the beginning of the year the Committee organized by the choice of Charles G. Chick, Chairman, and George M. Fellows, Secretary. The rules and regulations of the Board of last year were adopted and sub-committees appointed as therein provided;

High School, Messrs. Fellows, Davis and Vose.

Grew School, Messrs. Cotter and Davis.

Fairmount School, Messrs. Washburn and Fellows.

Greenwood School-Messrs. Vose and Chick.

Damon School-Messrs. Chick and Cotter.

Butler and Industrial Schools -Messrs. Davis and Washburn.

Evening School-Messrs. Cotter and Washburn.

#### SCHOOL ORGANIZATION.

#### HIGH SCHOOL.

• Mr. John F. Elliot, Master; Mr. Samuel W. Culver (to July 1887), Mr. Emerson Rice (since Sept. 1887), Sub-Masters; Miss Sarah L. Miner and Miss Fannie G. Merrick, Assistants.

Graduates (four years course).—Edward Edmund Badger, Walter Francis Bryant, Lillian Mabel Gould, Rose Ella Hughes, Bessie Corina Sparrell, Helen G. S. Harrington, Lena Elsworth Beach, George Daniel Bussey, Mabel Elton Holmes, Nettie Putnam Jenkins, Josephine Eliza Thompson. Business Course.—Annie Amanda Grant, Ellen Veronica Morrison, Henry Adams Norris, Nellie Louise Sanborn, William Henry Scott, Frank Howard Waters.

It has been for many years the custom to present a report of the condition of each respective school prepared by the Sub-Committee in charge. This method has usually been followed, except in years when the report has been prepared by a Superintendent having charge of all the schools in town.

This year it will be observed that no reports of Sub-Committees appear, the committee having decided to omit them and cover all matters of interest in one general report.

It has been the policy of the Board to give all matters of importance to the schools careful consideration that good results might be obtained and the school work carried forward with the least possible friction to all concerned; care has also been taken that the cost to the taxpayers might be kept at the lowest point consistent with desirable efficiency. Some matters which have received attention will be stated at length, while there are many others which it will be impossible to consider here. In the consideration and settlement of no question has there been a want of harmony in the deliberations of the committee; all have united in doing what seemed proper to keep the standard of our public schools as high as possible with the means at hand.

# SUPERVISION.

One of the first matters to demand careful attention was the question of proper supervision.

In August 1885 Mr. David Bentley was employed as superintendent of our schools and continued in that office until April 1st last. During the time of his employment the committee entrusted to him the matters of examining teachers, visiting schools, conducting examinations of pupils, purchasing text books and supplies and other duties properly pertaining to this office. At the town meeting for appropriations held in March, no money was provided for the salary of a superintendent during this year. In view of this fact your committee did not feel warranted in the further employment of Mr. Bentley, and he at once retired from the office. While in the service of the town Mr. Bentley had the welfare of its schools at heart and used his best efforts to make them efficient. With his retirement all matters of supervision at once devolved upon this committee. Our town being small in area and compact in population enables the schools to be well graded and accommodated in the four large buildings provided by the town for their use. This requires us to employ a master at each of these buildings and makes it possible to obtain constant and careful supervision of all the schools without the expense attending the employment of a person especially for that purpose. The masters in charge of the several schools are able, experienced and fully devoted to their work. They have been in their respective positions for many years and know the working of the course fully, and they have the assistance of a faithful corps of teachers. All try to secure uniformity of work throughout the schools of the town. At the request of the committee these gentlemen meet each month and consider the especial wants of the schools, they map out the work of the prescribed course to be performed during the month ensuing.

At these meetings methods are discussed and compared, and the work of each grade considered. The conclusions reached at these meetings are submitted to this committee at the regular meeting held next thereafter, and such action taken as seems to be for the best. The masters have also been given power to hold a meeting of all the teachers one afternoon at the beginning of each term for a full discussion of the work of the term. This plan supplementing the visits and inspection required of the committee is giving good satisfaction. The masters and teachers feel a greater degree of interest in the results as they have a voice in planning the work.

## TEACHERS' EXAMINATIONS.

One of the most, if not the most important duty devolving upon a school committee is in the selection of teachers.

If good teachers are not secured the schools are weakened at the point where the most strength is needed. All other elements for a successful school may be of the best, yet the results will be indifferent if the instruction be entrusted to weak teachers. At the annual examination held in August, but few applicants were present and several of these failed to pass the tests acceptably. When the vacancies occurred in the Grew School it was found that the list of available teachers had become so reduced that it was necessary to hold another examination. This was held in October and especial efforts made to give notice; about forty ladies took this examination and a large per cent. of them were accepted, and placed upon the list. Many of these ladies were graduates from Normal schools and teachers of experience. It is safe to say that it has been a long time since so many teachers of ability and experience have taken the examination here. It seems now that we have a list from which it will be possible to fill any vacancies that may occur in the near future with good teachers.

### TEACHERS.

It is a well known fact that we are often called to part with able teachers; this year has been no exception in this particular. Causes exist which contribute to this result which have been so often stated that it seems unnecessary to here state them at length. Briefly they are our inability to compete with neighboring cities in the matter of salaries, and the resignation of lady teachers to assume marriage relations. From the first cause we have lost during the year Misses Foster, Halden, and Colcord at the Grew School and from the second, Miss Sears at the Damon and Miss Darling at the Grew School. Miss Brainard's health becoming somewhat impaired, she resigned her position at the Grew School early in the year. The town has lost by these resignations faithful and painstaking teachers.

At the High School Mr. S. W. Culver resigned his position as assistant teacher in June.

The loss of so many valuable teachers was unfortunate and placed much responsibility upon the committees in charge, and especially was this so at the Grew. By reason of a change in the schedule of salaries this sub-committee was enabled to induce Miss Farnsworth to resign her position in Somerville and return to the service of our town. The excellent record of this lady as a teacher at the Greenwood School in former years renders comment here unnecessary. Other vacancies at the Grew were filled by the appointment of Misses Gushee, Edson and Sheldon. The work of these ladies thus far gives promise that the duty of the local committee has been judiciously performed.

At the Greenwood school no vacancies have occurred, but when the VI class was assigned to a separate room, Miss Perry was placed in charge and all other teachers above the XI grade were promoted one grade, and Miss Wood of the Butler School was transferred and placed in charge of the X grade, Miss Gidney being placed in charge of the Butler School.

At the Damon School, Mrs. Pettee, a former teacher in this school was employed in place of Miss Sears. At the Fairmount School no vacancies have occurred, and the work of the school has progressed under favorable circumstances.

The sub committee of the High School after an examination of many applicants, appointed Mr. Emerson Rice, a graduate of Dartmouth College, to fill the position left vacant by Mr. Culver; his work in the school is entirely satisfactory and thus far proves the wisdom of his selection. The real success of our schools must largely depend upon the merits of the teachers employed. If proper caution is used in the selection of instructors and they are furnished with good accommodatious and facilities for their work there need be no anxiety as to results, and especially so if they receive the proper moral support and encouragement from the patrons of the schools.

#### SALARIES.

As has already been said neighboring cities are able to offer higher salaries to teachers than we are warranted in paying. In consequence of this we have from time to time lost many of our best teachers; sometimes this has occurred

where an advance of \$50 per year would have retained in our employ valuable teachers. The strong teachers in the higher grades are usually taken, and therefore our loss is more serious. To guard against this evil your committee in August last adopted a new schedule of salaries whereby teachers thereafter employed in the XII grades begin at \$375, per year and advance \$25 each year until a maximum of \$450 is reached in the fourth year. The XI and X grades begin at \$350 and are advanced in like manner till a maximum of \$400 is reached in the third year. The IX and VIII grades begin at \$400 and are advanced as heretofore to a maximum of \$450 in the third year. The VII grades begin at \$425 and advance to a maximum of \$500, in the fourth year. The VI class begins at \$475 and advance to a maximum of \$500, in the second year. The masters' salaries have been advanced from \$1,200 to \$1,300 per year. The pay of the teachers at the High School remain as heretofore. By a vote af the committee the new schedule does not operate to reduce the salary of any teacher in the employ of the town when it was adopted. This change in the schedule has made but a small increase in the monthly pay roll. It is hoped this change will enable the town to better retain its best teachers in the higher grades. All grades are important, but it is more difficult to secure competent teachers for the VI and VII grades than for the XI and X grades, the element of discipline being an important factor in grades composed of older pupils.

The XII being composed of the youngest children just entering school, it is very difficult to obtain proper teachers. The methods of instruction must largely originate with the teacher and be of a simple and interesting kind. A great degree of care must also be exercised as to the comfort  $an_d$ health of the little ones. In view of these things the pay has been fixed as above.

#### GRADING.

The number of pupils in the V. and VI classes having increased to such an extent that they cannot be well accommodated in the masters' rooms, the VI classes have been placed · in charge of lady teachers and assigned to separate rooms. The Damon School is an exception, as there the V, VI, and VII classes occupy the master's room for study and general exercises and use an unoccupied room for a part of the recitations. Mr. Cross has the assistance of Mrs. Senancour.

At the Grew School the number of pupils of the VI class being large, it was found necessary in September to place a part of this class in the master's 100m and Miss Noble was employed to assist Mr. Dean.

# HIGH SCHOOL.

This school is now in good condition although it has suffered some inconvenience by the presence of a portion of the Greenwood School, yet no serious interruption of the work has occurred. The old steps leading to the building have been replaced with new ones, built in a thorough manner. The grounds have been graded to some extent and a new fence built along the front of the premises. The number of pupils increase from year to year, but unfortunately the building occupied does not expand in like porportion. The work of the school would be much improved if in possession of a larger building equipped with a good laboratory and other facilities for the work of the course. Should the number of students continue to increase, a new building will soon be necessary.

## ACCOMMODATIONS.

The burning of the Greenwood school building in July last, seriously interfered with the work of that school for this year. The old building contained eight rooms and during the summer vacation the eighth room was furnished for the use of the sixth class at the beginning of the school year in September. The destruction of this building made it incumbent upon the committee to provide for about 350 pupils elsewhere. The local committee after much investigation and time spent in trying to secure rooms which would suitably accommodate these pupils, decided to adopt the plan of allowing them but one session of about four hours each day, and arrangements were made with the sub-committee of the High school, so that the High school building together with the little Everett building might be used. In obtaining rooms many things in connection with the comfort and safety of the children had to be considered. Several places were suggested for schools but upon examination they would be objectionable from want of sanitary arrangements or from want of a safe place for out-of-door exercise. As the plan above named secured these, as well as all facilities for the school work, the Board ratified the one-session plan and the use of the buildings suggested. The situation was a difficult one; some inconvenience must arise from whatever plan was adopted.

The teachers of both the High and Greenwood Schools accepted the situation in the proper spirit and the work of the Greenwood School has been all that could be expected.

The Committee would here express their appreciation of the commendable spirit of patience and courtesy which the parents and pupils of the Greenwood district have accepted the situation, all seeming determined to bear the calamity cheerfully and to make the best of a bad state of affairs.

By the terms of the contract the new building is to be completed on April 1st, next, all indications now point to the occupation of the building by the school at the beginning of the spring term. The new building is to be equipped with apparatus for steam heating, speaking tubes, electric bells and other modern improvements. In this connection we would say that after hearing and considering other propositions it was the unanimous judgement of this committee to rebuild the Greenwood building upon the old site and this conclusion was ratified by the town without a dissenting vote.

The number of pupils at the Fairmount building having increased beyond the capacity of the eight rooms of the building the Local Committee was empowered to arrange for a room in the hall. This room has been finished and furnished so that the building now has nine good school rooms. The one in the hall being arranged with sliding petitions so that the whole hall can be used when necessary. The building has been repainted during the year and it is now in thorough repair. The Damon building will need repainting the coming year. When the new Greenwood building is completed the children of the town can be comfortably and conveniently provided with school facilities.

## COURSE OF STUDY.

Some changes have been made, the most important being the replacing of the elementary grammer in the eighth grade for use in connection with the study of language. It seems well to retain in a system of education some things which will tend to develop careful study and train the pupils in the proper use of bocks. To devote a full year to the study of language in this grade from a system of oral lessons without any systematic use of the text book was not found to produce the best results.

#### TEXT BOOKS AND SUPPLIES.

At the beginning of the year Mr. Fellows secretary of the Committee was made purchasing agent for the Board. During the summer vacation, having in hand careful estimates of the wants of the respective schools for the coming school year, he ordered the required amounts to be delivered at the several buildings and placed in charge of the Masters for use when needed. Much time is saved by this plan as the schools can be supplied by the Masters as wants arise.

During the summer vacation the Committee adopted the use of the new edition of Warren's geography in place of the edition previously in use. The new book is an improvement upon the old one and is appreciated by the teachers.

In view of the books and supplies now on hand but little additional expense need be incurred in this particular during the balance of the school year.

# ATTENDANCE.

The attendance has been well sustained, except that during the fall term many children were forced to be absent from the Grew and Damon Schools by reason of sickness. So seriously did this cause interfere with these schools and in view of apprehended danger to the children in attendance it was thought wise to close them for the two weeks' next before the Thanksgiving recess.

The attendance of the the pupils of the Greenwood district has been all that could be expected, when the situation there is taken into consideration.

We would refer to the tables at the end of this report for full information upon this head.

# TRUANCY.

Under the systematic attention of Truant Office Conlan, a marked improvement in this matter is apparent. A difficulty in the past has arisen from the fact that the officers appointed could ill afford to take their time when needed for this duty. The matter now receives prompt attention whenever occasion demands.

The pay of truant officers was fixed by the Board at 25 cents per hour of *actual* duty.

# EVENING SCHOOLS.

Teachers, Mr. Emerson Rice and Miss Mary J. Roome.

The school opened in the Grew School building on the 19th of December last with about 60 pupils in attendance, but as usual the number has fallen to about twenty regular attendants at present. The work of the school for those who have attended has been satisfactory. It is to be regretted that a large number of the young men and women who are employed during the day in other pursuits do not patronize these schools. As has been said in years before, the citizens are generous in their support of Evening Schools, and that large numbers are not benefited by these schools is in no way the fault of the town. We fear parents and guardians of children unable to attend day schools do not properly interest themselves that the children under their charge attend these schools. We earnestly hope for future improvement so far as attendance is concerned.

#### MECHANICAL DRAWING.

A school for instruction in this subject, in charge of Mr. H. W. Killam, is open five evenings during the week, in the winter season, at the High School building. The attendance is not so large as could be desired. Those attending are interested and are doing good work.

#### APPROPRIATIONS AND EXPENDITURES.

At the annual meeting in March the following appropriations were made;

For	salaries, janitors a	nd fu	.el		,		\$25,500
66	text-books and sup	plies					1,500
66	incidentals .						3,000
66	Evening Schools						400
56	Industrial School	•			•	•	150
	Total .	•				•	\$30,550

Unexpended balances from last year:

Salaries, janitors	and	fuel					\$449	43
Text-books and s	uppli	es					2	72
Incidentals .							1	28
Evening Schools	•						241	32
Repair of High S	chool	build	ling				*107	75
Fire escapes								
Superintendent's	salar	у					165	00
Total						. 8	\$1,349	17

\*Transferred to school incidentals at annual meeting.

In November a further sum of \$1,000 was appropriated for school incidentals, making the gross amount of funds furnished by the town for school purposes \$32,899.17, exclusive of the small amount from the Massachusetts School Fund. This sum has been expended as follows :

For	teachers'	salaı	ies							\$28	3,073	89
+ 6	music tea	chers	5								600	00
• 6	janitors										798	00
6.6	fuel									• ]	1.477	54
	Evening								•		318	67
6 6	text-book	is and	l supj	plies		`.				. 1	1.473	91
6.6	incidenta	ls						,		. 4	1,855	70
4.6	Superinte	enden	t's sa	lary*							300	00
									•			
										\$3:	2,397	71
	Balance	nex	ende	đ	•	•	•	•	•	•	501	46

\*\$135 paid from incidentals.

The large amount paid for school incidentals includes the amounts paid for providing the additional room at the Fairmount building and furnishing the same, also furniture for one room in the old Greenwood building, which was lost by the fire; also furniture for a portion of the sixth class in the Grew school, and incidental expenses occasioned by the destruction of the Greenwood building. We have expended from the Mass. School Fund \$182.36 for teachers salaries and \$35 for a chart, and have a balance on hand.

#### SCHOOL WORK.

The matter of Reading has received much care and attention. In the primary grades the children are instructed from charts and by the use of supplementary reading suited to each grade. Exercises in script reading are frequent and the children are drilled in phonetics that the articulation may be good. Sight reading is much practiced in the higher grades and much attention given to the study of proper definitions of words and efforts so directed that the children may read understandingly. It seems almost impossible to secure a good volume of voice in the higher grades Much care is taken by the teachers in charge to secure this, but from some reason a large per cent of the pupils in the Grammar grades do not use voice enough to be heard with ease and pleasure. This is not peculiar to our own schools, but is a very general fault in many schools other than ours.

In Arithmetic the object has been to obtain thoroughness in the work performed. The important subjects have received careful attention, the work of the course being so divided that the steps from grade to grade should be gradually taken.

In the lower grades the children have been required to master one underlying rule for each subject taken up, and to know its application. Much attention has been given to rapid mental and slate work. In this, practical problems have been used and mathematical puzzles have been avoided.

In the lower grades much attention has been given to the multiplication tables, that the children may be familiar with the combinations of numbers before taking the work of the more advanced grades.

Object lessons have been given to some extent and the schools have been supplied with measures of various kinds and the children taught their use in a practical manner. From actual use they learn the number of pecks in a bushel and the number of feet in a yard. This method creates commendable interest in the pupils, especially so in the lower grades.

In the study of *Languages*, two objects are accomplished. 1st, to give systematic training in the use of good English. 2nd, to secure mental discipline that results from the study of grammar as the science of language. The methods have been to instruct the primary grades by frequent oral and written exercises of a kind to form a foundation for the better understanding of technical grammar.

In the lower grammar grades the same system prevails with the addition of more definite preparations for the difficult work of the higher grades. The last three years of the course is devoted to the study of technical grammar with a view to developing the powers of the mind, that may enable it to comprehend the limits of a definition, grasp a scientific principle, analyze, compare, discriminate and classify. The study of technical grammar affording one of the best means of exercising the powers of the mind, the time for its study has been extended rather than curtailed.

Geography has received its proper attention, eare has been given to the location of divisions and countries with due regard to the physical and climatic characteristics of each, the work being arranged to meet the capacity of the respective grades. It has been the endeavor to impress the minds of the pupils with the character of each country socially, politically and physically, and to show the effect of the climate upon animal and vegetable life and especially upon the life and pursuits of man. Map drawing and map building are used to fix the physical features of states and countries, and the location of oceans, seas, b ay, rivers, mountain systems, important cities and commercial centers. The plan of the work in *United States* History is to devote the time of two lower grades where this subject is taught to the use of the text book, as a supplemental reader, talking and writing much about the subjects read.

In the V, VI and VII classes important dates and accounts of import events are carefully taught. In this connection maps are sketched and prominent historical places located.

Careful attention is given to the morals of history, and lessons are conducted so that cause and effect may appear, thus training the judgment in estimating the quality and result of political action in order that the foundation for citizenship may be good. Historical topics are often made the subject of compositions and declamations.

In *Physiology* it has been the aim to instruct the pupils so that a good knowledge of the laws of health might be obtained, more prominence being given to this than other features. The prominent facts as to the structure of the body are taught and the effects of alcohol, tobacco and opium upon the system are impressed upon the mind. The methods are by oral instruction and illustrations by the use of charts aud objects memorizing enough to make the technical teaching intelligible. In higher grades pupils are required to write descriptions of the parts of the body, explain their care and the effects of poisons upon them.

In *Spelling*, efforts have been directed to secure the proper use as well as the correct spelling of words in all grades; this is thought better than the spelling of many words without a knowledge of their use. In more advanced grades, where dictionaries are placed in the hands of pupils, root words and derivatives are taught, that pupils may learn the relation which different words have to each other.

Writing and Drawing have received proper attention and good results have been obtained.

Music has been taught under the direction of Mr. Whittemore and his daughter, Miss Mary E. Whittemore, with the usual results.

## GENERAL REMARKS.

The stability of our institutions depends so largely upon the intelligence and patriotism of the people that the public schools were early established for the proper education of the youth in matters deemed of prime importance to the well being of the state. From time to time branches of study have been added to the required course in keeping with the demands of the age and good citizenship. We hold it to be the duty of all citizens to see to it that the children receive the instruction required by the state, that the blessings of our government may be transmitted to coming generations without injury at our hands.

Some children there are who from force of circumstances, are unable to attend the public schools long enough to cover the whole time allowed by the town for the completion of the full course, but there should be none who cannot take sufficient advantage of our school system to enable them to read, write and understand to some extent the other required studies.

There is much that might be said as to the character of the work to be expected from the public schools. There is often a tendency to look only at the average per cent obtained upon the examinations of the pupils and to judge of the efficiency of the school by what appears there. It is sometimes thought that the knowledge of technical arithmetic, grammar and kindred subjects, obtained in the few years of our school course indicates the value of our school system, and it seems at times as if school authorities adopted courses of study and systems of promotion to this end, regardless of all other matters. Some of the results of such action, are seen in children with constitutions impaired, nervous systems prostrated, and it is often the case that children loose much if not all of the benefits of the public schools because of such systems.

In the present age where so much competition exists in business affairs that success depends largely upon the activity and push of the citizen, and where the vital and nervous forces are heavily taxed by the individual in after life, great care should be taken that the school children may not draw so heavily upon these forces as to find themselves at the close of the course, physically unable to secure to themselves the best results from their mental attainments.

In all matters pertaining to the education of children, the object to be obtained should be kept well in view,—the training of citizens strong physically as well as mentally.

A work of the schools which cannot be overlooked is in the moulding of character. Great care should be taken to impress the children with the value of correct habits, to impress them with habits of honesty, of truthfulness, of temperance, of punctuality, of industry and of self-reliance, with a habit of thoughtful care in their relations to each other, and the duty of obedience to lawful authority. It is to these things we are to look for the character of our citizens in the future and should our schools fail in these matters enjoined by the laws of the Commonwealth, the result to the community would be serious. Let it not be lost to sight that the school is designed to train the boy to be a man, to accomplish this each element that is requisite to that end should receive its proper attention, that we may have strong, broadminded and intelligent citizens entering active life from our public schools.

We want a broad system of education that can, and will, while giving the care to technical study requisite for acquiring mental strength, also protect the physical system and lay the toundation for citizens of manly habits. Upon such citizens our free institutions may safely rest. For the training of such citizens the people are taxed and it thus becomes the duty of all school officers and teachers to see that all these matters receive appropriate care. A school course which gives all of its time to the development of one element with no proper care for the others, is faulty and does not develope the best type of men and women.

It is not here contended that the present design of the public school is, to fit the boy for a special pursuit in life, the diversity of business callings makes that impossible. Much must be left to individual effort, but the foundation necessary alike for all classes is to be supplied at the public expense by the public schools.

In the early years of life, habits of independent thought are to be formed, the reasoning powers developed and strengthened and methods of thoroughness impressed to the end, that when the child becomes a man he may for himself grapple successful with the duties of life.

We cannot close this report without commending the teachers in charge of our schools, for their faithful work during the year, and expressing our thanks to the citizens of the town for the prompt and generous manner with which the wants of the schools have been supplied.

Respectfully submitted,

CHARLES G. CHICK, Chairman.
